Executive Summary

PyCon Cameroon 2026 brought the country's Python community together for three days at the Girafe Hôtel in Yaoundé, from September 17 to 19. For the first time, the conference was paired with UbuCon Cameroon, a full day dedicated to Ubuntu and open source, co-organized with the local Canonical user group.

The programme mixed keynotes, talks across three parallel rooms, hands-on workshops, a bilingual panel on tech jobs and AI, lightning talks and community games. Sessions ran in English, French and both, reflecting the bilingual nature of Cameroon's tech scene.

None of this happens without our sponsors, partner communities, speakers and volunteers. This report is our thank-you, and an open account of what their support made possible.

Day by Day

Day 1 · September 17, 2026

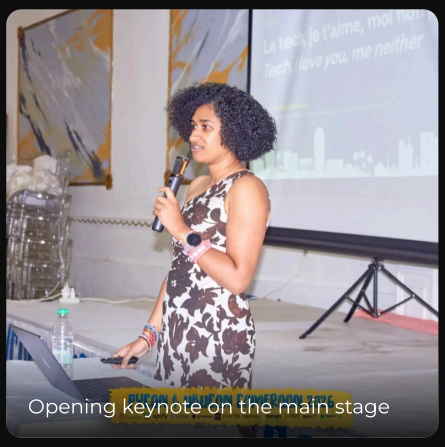

PyCon opens

Attendees queued outside the venue from early morning for registration and welcome coffee. After the opening ceremony, Sarah Abderemane's keynote set the tone, and the day split into three rooms covering web and security, AI and data science, and DevOps and cloud: microservices with Django and FastAPI, a vector search engine built from scratch, Terraform for Django on AWS, ASGI, MCP servers in Python and IoT for car diagnostics. The day closed with a workshop on burnout and cognitive overload, followed by community games.

Key sessions: La Tech, je t'aime, moi non plus (Sarah Abderemane)

Packed main hall in front of the PyCon & UbuCon Cameroon backdrop

Opening keynote on the main stage

Day 2 · September 18, 2026

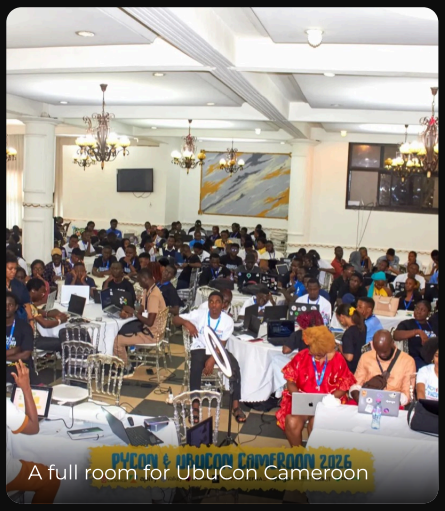

UbuCon Cameroon

Day 2 was dedicated to UbuCon Cameroon, co-organized with the Canonical user group. Adonis Simo opened with a keynote on building a SaaS in Africa for the world, followed by a day of hands-on sessions: a roadmap to open source for Cameroonian developers, Django with Valkey for caching and real-time features, Daniele Procida on career success and early-career jobs, Google Workspace AI, two-factor authentication with Django, and the Open Documentation Academy.

Key sessions: Building a SaaS in Africa to the World (Adonis Simo)

Day 3 · September 19, 2026

PyCon closes

Veliswa Boya's keynote on keeping the human in the loop as AI writes more code opened the final day. Three rooms then covered Python in the browser, concurrency, Metabase dashboards, creative coding with Matplotlib, AI workflows and reactive Django. A bilingual panel on tech jobs and AI brought together Daniele Procida, Veliswa Boya, Leslye Nkwa and Marc Daha, followed by talks on security, smart agriculture and WhatsApp bots. Open lightning talks and a live graffiti artwork led into the closing ceremony, awards and group photos.

Key sessions: AI Can Code, But It Can't Think Like You (Yet): The Human in the Loop (Veliswa Boya) · Tech Jobs & AI: Surviving Automation, Excelling at Creating Value (Daniele Procida & Veliswa Boya & Leslye Nkwa & Marc Daha)

05

Thank you to our Sponsors

Your support funded the venue, meals, swag, financial aid and the experience above. Here is where your brand showed up.

Stage backdrop & photo wall

Sponsor logos sat behind every keynote and in the most-photographed spot of the event, visible in the official group photos.

Roll-up banners

Sponsor roll-ups stood in the main hall and breakout rooms for all three days.

On-screen thank-you

Sponsors were thanked from the main stage, with their logos on the big screen.

Website

Every sponsor is listed with a description and link on the conference website, including this report.

Our sponsors

Diamond Sponsor

- Canonical

Speaker Dinner Sponsor

- AWS

Bronze Sponsors

- Apify
- Valkey
- SupraPay
- Trust Consulting

Community Sponsors

- Black Python Devs
- CHAOSS
- Django Software Foundation
- JetBrains
- DEFNA

Hosting Sponsors

- PythonAnywhere

06

Financial Aid

Part of the budget went straight back to the community, so cost was not the reason someone missed PyCon Cameroon.

Ticket grants

Free conference tickets for students and community members who could not afford one.

Accommodation

Hotel nights in Yaoundé for speakers and grant recipients travelling from other cities and countries.

Transport

Travel costs to Yaoundé covered for speakers and grant recipients coming from other regions.

07

Partner Communities

The local communities that helped spread the word, bring attendees and run sessions.

- UbuCon Cameroon
- Django Cameroon
- Angular Cameroon
- AWS User Group Douala
- GDG Yaounde
- Onyani
- Reckot
- Microsoft User Group Cameroon

Thank You

To every speaker, volunteer, organizer and attendee who made PyCon & UbuCon Cameroon 2026 happen: thank you. Want to support the next edition, or have questions about this report? Get in touch.
